Ahmed khalid kamal Atta

Full stack developer

kmalahmdkhald927@gmail.com   01050541668   Benha   Ahmed khalid   Ahmed khalid

Career Summary

Dedicated and skilled full Stack Developer with a strong foundation in creating dynamic and responsive web applications. Possesses hands-on experience in developing full-stack applications using MongoDB, Express.js, React.js, and Node.js. Adept at collaborating with cross-functional teams to deliver high-quality software solutions. Committed to continuous learning and staying updated with the latest industry trends and technologies to deliver innovative solutions. Eager to leverage academic background and practical experience to contribute effectively to a forward-thinking development team.

Education

Bachelor of Computer Science and Artificial Intelligence, Benha University   9/2020 – 7/2024

Projects

My Portfolio

The aim of the project is to provide an overview of recent business projects, contacts, educational qualifications, and experience, ensuring grammatical accuracy and adherence to rules.

Technologies, Tools: HTML, CSS, JavaScript, particles, mixitup

Repo: https://github.com/AhmedKhalid2002/my-portfolio

Demo: https://ahmedkhalid2002.github.io/my-portfolio/

E-commerce

The project utilizes various technologies such as React, React Bootstrap, and React Router DOM. It aims to provide an online shopping platform where users can browse and purchase products. The repository contains code files and resources related to the e-commerce project. It includes features for users to sign up, log in, manage their profiles, reset passwords, add products to their cart, add items to their wishlist, and make payments using either cash or a Visa card.

Technologies: React.js, React-Router-Dom, Bootstrap5, Hooks and functional components, Redux-Toolkit, React-query, Formik, Yup, Integration with route API, Axios, React-Helmet, React-Toastify, React-Slick

Repo: https://github.com/AhmedKhalid2002/Ecommerce-figma

Demo: https://ahmedkhalid2002.github.io/Ecommerce-figma/

To-Do-List

The project aims to store our goals, whether finished, in progress, or upcoming, in organized lists.

I implemented CRUD operations in this app, allowing users to add, update, and delete lists.

The app also features functionalities such as search, and both dark and light modes.

• **Technologies**, Tools: HTML, CSS, JavaScript, Bootstrap, local storage.

- **Repo**: https://github.com/AhmedKhalid2002/to-do-list

- **Demo**: https://ahmedkhalid2002.github.io/to-do-list/

Anime App

The project is divided into two parts: a backend part and a front-end part. It includes the ability to add specific anime to the anime season with designated numbers of episodes and characters. Additionally, it allows for CRUD operations. Users can create accounts, login, signup, and activate their accounts. They can also change their profile pictures. The project involves models for users, reviews, anime, characters, and seasons

- **Technologies**: **Backend, tools:**
bcryptjs,cloudinary,cors,dotenv,express,joi,jsonWebToken,mongoose,morgen,multer,nanoid,nodemailer,randomstring

frontend, tools : React.js, React-Router-Dom, Bootstrap5, Hooks and functional components, Formik, Yup, Axios, React-Toastify, chart.js, jwt-decode

- **Repo**: https://github.com/AhmedKhalid2002/Anime-node
